

# The Irresistible Tool to Encourage Writing

Supports the writing process by hand and at the computer

Dr. Peggy Healy Stearns'

Ideal for Grades K-5

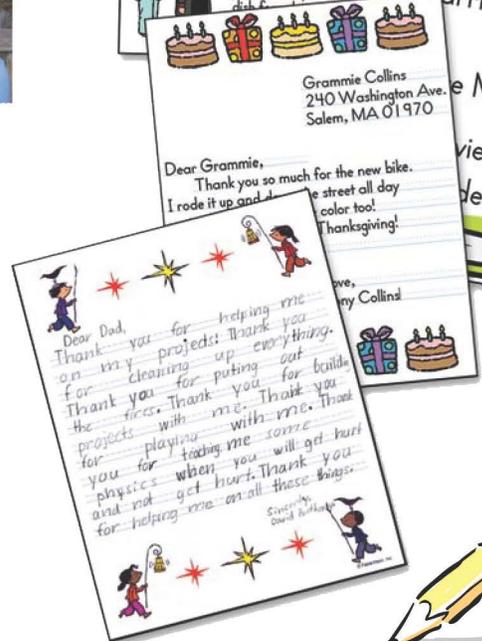

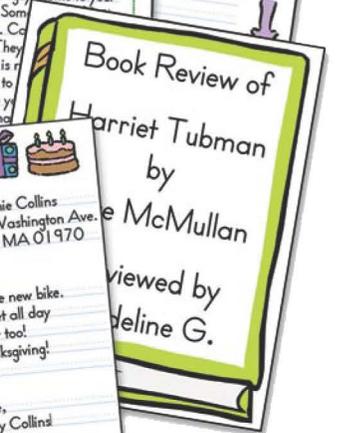

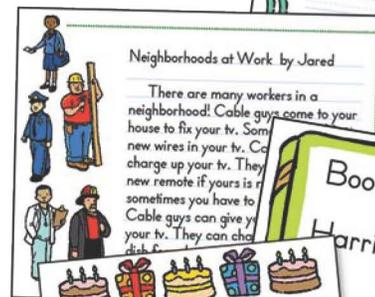

## Benefits

- ✓ Gets children writing.
- ✓ Provides curriculum-based activities & creative designs.
- ✓ Helps students create books, essays, reports, letters, and more.
- ✓ Boosts technology literacy skills.

With three powerful tools, *Stationery Studio* inspires even the most reluctant writers.

1. Features for customizing line style, line width, layouts and fonts (including dotted fonts) for students' handwritten assignments.
2. Introductory word processor for students with all of the basics and none of the confusion.
3. Teacher tool for presenting content and assignments in a more inspiring, engaging way.

*Stationery Studio* works with interactive whiteboards to foster collaboration. It includes templates for stories, letters, reports, certificates, books, and more!

## From the Author

Children who learn to write well have a lifelong advantage. In school, effective writing skills are essential to academic achievement and success on a growing battery of standardized tests. In a broader context, communication skills allow children to connect with the world, to share experiences, and to express feelings and opinions. On both a personal and global scale, communication is the key to conflict resolution and lasting peace.

*Stationery Studio* allows teachers and students to choose from over 400 imaginative and inspiring borders and shapes that support writing across the curriculum. And it offers what no other program does – an introductory word processor and an easy tool for customizing writing lines and layouts for handwritten assignments that suit your students' developmental level and your instructional objectives.

We are excited to share *Stationery Studio* with the world. We trust it will encourage a flurry of writing and creativity in your classroom!

— Peggy Healy Stearns, Ph.D.

# Stationery Studio Supports Universal Design for Learning

The Center for Applied Special Technology (CAST) has developed the Universal Design for Learning (UDL) teaching model that advocates incorporating multiple means of **representation**, **expression**, and **engagement** throughout the curriculum. *Stationery Studio's* curriculum-based designs inspire young learners to write, research, explore, and create a product of which they are proud. Students bring their own individual style to the writing process and experience success. These positive experiences prepare students for a lifetime of learning and encourage all learners to reach their true potential.

## REPRESENTATION

*Stationery Studio* provides teachers with multiple means of representation for the writing process.

- Allows teachers to create templates for students to modify, embellish and complete both on and off the computer.
- Facilitates whole class, small group, and individual projects and activities.
- Supports the development of writing skills by providing customized stationery appropriate to students' interests, developmental level, and purpose.
- Provides an extensive collection of Peter H. Reynolds' whimsical illustrations that stimulate the imagination while reinforcing background knowledge about a wide range of lesson topics aligned with the K-5 curriculum and student interests.

## EXPRESSION

*Stationery Studio* provides learners with alternative ways to demonstrate what they know.

- Empowers students to write, share ideas, add their own images, and demonstrate content knowledge in a personalized and professional manner, both on the computer and by hand.
- Creates letters, books, invitations, certificates, reports, and more. Lets students print in color or in black and white to color by hand.
- Cultivates pride in completed projects and enables sharing with multiple audiences.

## ENGAGEMENT

*Stationery Studio* engages classroom learning from topic selection to publication.

- Motivates planning, goal setting, strategy development, problem solving, formatting a project to fit in a specific layout and follow-through to completion.
- Provides an easy-to-use visual interface that supports all learners, including those with assistive devices. Lets students view options before choosing them.

## AWARDS

- ★ Technology & Learning Award of Excellence
- ★ American Library Association Notable Software
- ★ Parents' Choice Recommended Software Award
- ★ Media & Methods Awards
- ★ Instructor-Teacher Raves Award
- ★ Children's Software & New Media Revue Award

Every learner is unique. FableVision Learning's *Stationery Studio* allows teachers and students to customize activities and projects to suit individual developmental needs and learning styles. *Stationery Studio* is an effective tool that enhances the writing experience and supports NCTE and IRA standards.
