

DESIGN & CREATE WITH FABMAKER STUDIO

# Build a Pyramid

FableVision Learning's **FabMaker Studio** is a web-based engineering & design program that makes it simple to provide students with meaningful STEM experiences to support design thinking.

**DID YOU KNOW THE FIRST PYRAMID WAS BUILT AROUND 2780 B.C.?**

In FableVision Learning's Engineering & Design CTE Program students will learn about the engineer as they create their own scaled version of a step pyramid.

**This is just the beginning!**

Over 18 weeks, students will learn about the different fields of engineering as they tackle hands-on-projects and hear from engineers in the field.
